MedSuite's Anesthesia Practice Management System

- On Demand Software
- High-Performance
- Relational Database
- Highly Responsive
- Heads-Down Data Input
- Rich Internet Application
- Scalable Architecture
- Large Practices
- Billing Services

On Demand Software

- Unrestricted Access Any Time... Any Place...
- Increased Security
- High Availability (24x7)
- Scales to 100's of Users
- Pay-As-You-Go
 - ◆ No Large Up-Front Costs
 - ◆ No Per-Seat Licenses
 - ◆ No 3rd-Party Software Licenses
- No Additional Fees for:
 - ◆ Software Support
 - ◆ Future Upgrades
 - ◆ Future Enhancements
- Reduced Overhead & Lower Costs...MedSuite performs:
 - ◆ Backups
 - ◆ Server Maintenance
 - ◆ Server Upgrades

Rich Internet Application (RIA)...

- Combines the robust functionality of desktop software with an Internet-based application
- Enables "heads-down" data entry
- Any Internet connection
- Runs on low-speed lines

RIA v. Browser-based

- RIA Offers:
 - ◆ "Heads-down" data input
 - ◆ Robust Windows Interface
 - ◆ Robust Dev Tools
 - ◆ Clear Standards
 - ◆ Rapid Development
- Browser Offers:
 - ◆ Low-Volume Input
 - ◆ Weak Interface
 - ◆ Weak Dev Tools
 - ◆ Define your own "standards"
 - ◆ Slower Development

On Demand Practice Management Software

The MedSuite Practice Management System is state-of-the-art On Demand software, which makes it available to you Any Time... Any Place... MedSuite offers a full-featured state-of-the-art Anesthesia Billing & Practice Management System specifically designed to address the unique needs of large practices and large-scale medical billing services. Not to be confused with a browser-based On Demand application, MedSuite is a Rich Internet Application or RIA, which combines the robust functionality of desktop software with an Internet-based application. MedSuite provides a new technological foundation that is extendable and stable, reduces the manpower necessary for practices and billing services to operate, and provides enhanced access to the backend data missing in most products on the market today.

We are committed to providing not only the most advanced software technology available, but also to an On Demand software service that increases productivity and reduces costs in the back office without a large capital investment. MedSuite was designed to improve the efficiency of your staff by automating manual processes using a high-availability, work-from-anywhere product. MedSuite's workflow was designed to facilitate "heads-down" data input while avoiding the "point-and-click" inefficiencies of many Windows-based products. MedSuite's high-performance, high-availability On Demand software is offered on a transaction fee basis, based on the number of Anesthesia Cases and Non-Anesthesia Encounters, and includes technical support, program updates, and enhancements. On Demand software means there are no large licensing fees, no long-term commitments, no new hardware purchases to make, and you only pay for what you use.

General Features

- ▶ Intuitive and user-friendly Windows graphical user interface
- ▶ "Heads-Down" Data Input
- ▶ Anesthesia & Front Office Visit Entry
- ▶ Scheduling of Repetitive Tasks (Reports, Transmissions, Closeouts, etc)
- ▶ Multi-Level Billing Organizations
 - Company
 - Practice: Multiple within a Company
